

REGARDING SCHOOL TRANSPORT

1. Arrangement of School Bus is uncertain because of the government policy on transport. If we follow the prevailing policy that only sitting passengers would be allowed, then the cost would of course be at least 1½ times more than the earlier bus fee.
2. The DTC at the moment have withdrawn their school bus service. Hiring charges of DTC is also expensive as they have high fixed minimum charges for school buses irrespective of the distance.
3. Most of the private bus operators have sold their buses because of the loss and there are not enough buses available from private operators and even if they provide, we are sure they will be expensive.
4. Decision on school transport will have to wait and will depend on these factors.
